Continuous Assistance Provided
by Dentium Implant Sales Representative

Lifetime Study Club
every 2-3 months

COMPREHENSIVE IMPLANT *Mentorship* PROGRAM

Dr. Sam Park

COURSE SUMMARY

Minimax Implant has designed a mentorship program specifically for dentists who are about to start placing implants or need professional and personal mentoring.

The two days lectures will cover how to diagnose, plan, and restore implants efficiently and effectively. Depending on each participant's level of interest, there will be clinical case presentations, starting with simple implant cases to some more full arch rehabilitation cases. Additionally, this program is not limited to two lectures, but through case discussions and continuous study clubs (every 2-3 months), participants will overcome the difficulties they face during implant surgery.

Since the mentorship program is designed to be a small group (with a maximum of 6 participants per session), it will help you to increase your knowledge regarding dental implantology that you wish to learn more about and to gain beneficial surgical skills from one-on-one legendary mentor.

1 Fundamentals of Implant Dentistry

Introduction to Dental Implants

- Understanding the evolution and types of dental implants.
- Exploring the role of dental implants in modern dentistry.

Treatment Planning and Case Selection

- Comprehensive examination techniques for treatment planning.
- Strategies for patient case selection and assessment.
- Incorporating patient-specific factors into implant planning.

2 Surgical Techniques in Implant Dentistry

Surgical Instruments and Equipment

- Detailed examination of instruments and equipment used in implant procedures.

Atraumatic Extraction Techniques

- Techniques for minimizing trauma during tooth extractions.

Socket Preservation Technique

- Preserving alveolar bone structure following tooth extraction.
- Minimizing bone resorption for improved esthetic outcomes.

Flap Design and Soft Tissue Management

Drilling Techniques and Bone Preparation

- Hands-on drilling exercises with a focus on precision and safety.
- Proper bone preparation and implant site development.

Utilizing Different Types of Bone Graft Materials

- In-depth exploration of bone grafting materials and techniques.
- Understanding when and how to use specific graft materials.

3 Implant Esthetics - From Extraction to Final Prosthesis

Immediate Implants- Anterior and Posterior

- Managing immediate implant cases in both anterior and posterior regions.
- Achieving harmonious and esthetic gingival contours.

Partial Extraction Therapy

- From case selection to execution

4 Prosthetic Aspects of Implant Dentistry

Prosthetic Planning and Impressions

- Digital and Conventional impression techniques.
- Prosthesis design

Fixed and Removable Prosthesis Options

- Understanding of fixed and removable prosthesis choices.
- Factors influencing the selection of the most appropriate prosthetic option.

Principles of Full Arch Rehabilitation

- Principles and techniques for rehabilitating full arches with dental implants.
- Understanding hybrid prosthesis options and their applications.

COMPREHENSIVE IMPLANT *Mentorship* PROGRAM

Dr. Sam Park

MENTORSHIP PROGRAM

Surgical Assistance at Your Clinic
*Once, within a 10km radius from the Melbourne CBD

or

Case Discussion via Zoom Meetings
*Three times

*You can choose either of these options for mentoring.

+

Additionally, following mentoring, we conduct regular Study Club sessions every 2-3 months. Those who have participated in mentoring at least once can continue to join these Study Club sessions for a lifetime. During Study Club, each doctor has the opportunity to bring cases for discussion.

LECTURER

Dr. Sam Park

Dr. Sam Park earned his Dental degree from the University of Adelaide. He actively participates in various conferences and seminars in Australia and overseas, keeping updated with the latest technology and knowledge. To further his commitment to lifelong learning, Dr Park maintains membership in many dental groups including AACD, AAID, ICOI, AO, & ADA.

Dr. Park has almost 20 years of experience in dental implantology. He focuses on dental implants and full mouth rehabilitation procedures. For the past 8 years, he has been invited as a keynote speaker for Dentium Implant Australia, sharing his invaluable knowledge and insights with fellow professionals.

Dr. Park understands the challenges faced by dentists venturing into the world of implant dentistry, particularly due to the limited coverage during university training. Recognizing this gap, he actively supports and educates dentists, equipping them with the necessary skills and knowledge to excel in the field.
