Lifetime Study Club every 2-3 months

COMPREHENSIVE IMPLANT MENTORSHIP PROGRAM

COURSE SUMMARY

Minimax Implant has designed a mentorship program specifically for dentists placing implants or need professional and personal mentoring.

The two days lectures will cover how to diagnose, plan, and restore implants efficiently and effectively.

Depending on each participant's level of interest, there will be clinical case presentations, starting with simple implant cases to some more full arch rehabilitation cases.

Additionally, this program is not limited to two lectures, but through case discussions and continuous study clubs (every 2-3 months), participants will overcome the difficulties they face during implant surgery.

Since the mentorship program is designed to be a small group (with a maximum of 8 participants per session), it will help you to increase your knowledge regarding dental implantology that you wish to learn more about and to gain beneficial surgical skills from one-on-one legendary mentor.

1 Fundamentals of Implant Dentistry

Introduction to Dental Implants

- Understanding the evolution and types of dental implants.
- Exploring the role of dental implants in modern dentistry.

Treatment Planning and Case Selection

- Comprehensive examination techniques for treatment planning.
- Strategies for patient case selection and assessment.
- Incorporating patient-specific factors into implant planning.

2 Surgical Techniques in Implant Dentistry

Surgical Instruments and Equipment

- Detailed examination of instruments and equipment used in implant procedures.

Atraumatic Extraction Techniques

- Techniques for minimizing trauma during tooth extractions.

Socket Preservation Technique

- Preserving alveolar bone structure following tooth extraction.
- Minimizing bone resorption for improved esthetic outcomes.

Flap Design and Soft Tissue Management

Drilling Techniques and Bone Preparation

- Hands-on drilling exercises with a focus on precision and safety.
- Proper bone preparation and implant site development.

Utilizing Different Types of Bone Graft Materials

- In-depth exploration of bone grafting materials and techniques.
- Understanding when and how to use specific graft materials.

3 Implant Esthetics - From Extraction to Final Prostheses

Immediate Implants- Anterior and Posterior

- Managing immediate implant cases in both anterior and posterior regions.
- Achieving harmonious and esthetic gingival contours.

Partial Extraction Therapy

- From case selection to execution

4 Prosthetic Aspects of Implant Dentistry

Prosthetic Planning and Impressions

- Digital and Conventional impression techniques.
- Prosthesis design

Fixed and Removable Prosthesis Options

- Understanding of fixed and removable prosthesis choices.
- Factors influencing the selection of the most appropriate prosthetic option.

Principles of Full Arch Rehabilitation

- Principles and techniques for rehabilitating full arches with dental implants.
- Understanding hybrid prosthesis options and their applications.

5 Hands-On Session

- Implant surgery guided and non guided surgery
- Immediate implant placement and custom abutment
- Socket preservation

ATTENDEES WILL BE PROVIDED WITH

MENTORSHIP PROGRAM

Surgical Assistance at Your Clinic
*Once, 10km from the Melbourne CBD

or

Case Discussion via Zoom Meetings
*Three times

*You can choose either of these options for mentoring.

+

Additionally, following mentoring, we conduct regular Study Club sessions every 2-3 months. Those who have participated in mentoring at least once are invited to join these lifetime Study Club sessions. During Study Club, each doctor has the opportunity to bring cases for discussion.

LECTURER

Dr. Sam Park

Dr Sam Park has been practising implant dentistry for the past 20 years. He has been continuously advancing his expertise through active participation in countless national and international conferences and seminars. Dr Park is a full-time clinician in a private practice focusing primarily on implant dentistry with an emphasis on advanced hard and soft tissue grafting. His expertise earned him the role of keynote speaker for Dentium Implant Australia for the past eight years. Dr Park is a respected member of the International Congress of Oral Implantologists (ICOI), holding both Fellow and Diplomat status.

Understanding the fast-evolving nature of dentistry, Dr. Park is aware of the challenges faced by dentists, where traditional university education may not fully prepare practitioners. He actively addresses this by providing mentorship and educational guidance to fellow dentists, empowering them with the necessary competencies and knowledge to excel in implant dentistry.

TESTIMONIAL

★★★★★

Dr. Harold L

Dr. Sam Park's implant mentorship programme was a game-changer, enriching my understanding of implantology from the ground up and allowing for immediate application in clinical practice. The small group sessions allowed Dr. Park to give me personalised feedback that- in my opinion- was the most valuable aspect of the mentorship programme. Every aspect of the programme was tailored to my needs and interest so it was perfect! Peer study groups provided an opportunity for me to delve deeply into individual cases. Not only was I able to refine my techniques, but my confidence levels skyrocketed! For those in search of a comprehensive implant course that you can apply to your practice the very next day, this is the one!!! I strongly recommend Dr. Park's mentorship to anyone looking to improve their skills and everyone interested in implantology!

★★★★★

Dr. Nita K

The course is very informative and well organized. I am a general dentist and got an opportunity to brush up my basics, and also learn the topics like implant case treatment planning and the significance of soft and hard tissue management. I highly recommend this course to fellow dentists.

★★★★★

Dr. James L

Great course for anyone looking into implant dentistry. Very informative theory component and variety of Hands-On. Experienced and engaging Speaker Dr Sam is excellent.

★★★★★

Dr. JYN

Sam is an approachable mentor that has a good depth of implant knowledge to learn from. We covered so much in the time that we had and it was a course I'd recommend to any dentists.
