COMPREHENSIVE IMPLANT MENTORSHIP PROGRAM

COURSE SUMMARY

Minimax Implant has designed a mentorship program specifically for dentists placing implants or for those who need professional and personal guidance.

The two-day lectures will cover how to diagnose, plan, and restore implants even for the most complicated cases. The course is rich with case discussions, covering everything from simple implant placements to GBR techniques and immediate implant procedures.

This program goes beyond just the two-day lectures. Through ongoing case discussions and regular study clubs held every 2-3 months, you'll be able to tackle the challenges you encounter during implant surgery.

Designed for small groups with a maximum of 8 participants per session, the mentorship program offers a personalized learning experience. You'll deepen your knowledge of dental implantology and refine your surgical skills with one-on-one guidance from a legendary mentor.

1 Treatment Planning and Case Selection

- Comprehensive examination for treatment planning
- Strategies for patient case selection and assessment.
- Incorporating patient-specific factors into implant planning.

2 Surgical Techniques in Implant Dentistry

Surgical Instruments and Equipment

- Modern instruments and equipment used in implant procedures

Atraumatic Extraction Techniques

- Techniques for minimizing trauma during tooth extractions.

Socket Preservation Technique

- Preserving alveolar bone structure following tooth extraction.
- Minimizing bone resorption for improved esthetic outcomes.

Flap Design and Soft Tissue Management

Drilling Techniques and Bone Preparation

- Hands-on drilling exercises with a focus on precision and safety.
- Proper bone preparation and implant site development.

Utilizing Different Types of Bone Graft Materials

- In-depth exploration of bone grafting materials and techniques.
- When and how to use specific graft materials.

3 Implant Esthetics - From Extraction to Final Prostheses

Immediate Implants- Anterior and Posterior

- Immediacy in anterior and posterior regions.
- Achieving harmonious and esthetic gingival contours.

Partial Extraction Therapy

- From case selection to execution

4 Prosthetic Aspects of Implant Dentistry

Prosthetic Planning and Impressions

- Digital and Conventional impression techniques.

Prosthesis design

- How you can prevent bone loss
- Factors influencing the selection of the most appropriate prosthetic option.

Fixed and Removable Prosthesis Options

- Understanding of fixed and removable prosthesis choices.

5 Hands-On Session

- Implant surgery guided and non guided surgery
- Immediate implant placement and custom abutment
- Socket preservation
- Removable Prosthesis - Overdenture system

COMPREHENSIVE IMPLANT MENTORSHIP PROGRAM

How are you going to handle these cases?

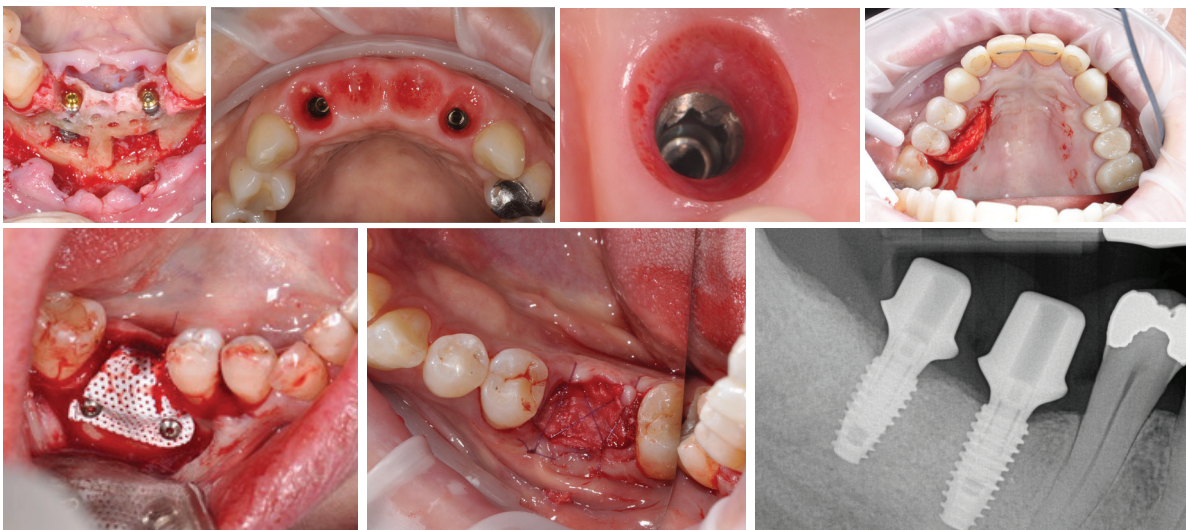

LECTURER

Dr. Sam Park

Dr Sam Park has been practising implant dentistry for the past 20 years. He has been continuously advancing his expertise through active participation in countless national and international conferences and seminars. Dr Park is a full-time clinician in a private practice focusing primarily on implant dentistry with an emphasis on advanced hard and soft tissue grafting. His expertise earned him the role of keynote speaker for Dentium Implant Australia for the past eight years. Dr Park is a respected member of the International Congress of Oral Implantologists (ICOI), holding both Fellow and Diplomat status.

Understanding the fast-evolving nature of dentistry, Dr. Park is aware of the challenges faced by dentists, where traditional university education may not fully prepare practitioners. He actively addresses this by providing mentorship and educational guidance to fellow dentists, empowering them with the necessary competencies and knowledge to excel in implant dentistry.

COMPREHENSIVE IMPLANT MENTORSHIP PROGRAM

TESTIMONIAL

★★★★★

Dr. Hasan A

The course was incredibly thorough, covering everything from the basics to advanced techniques like custom abutments, countersinking, and preventing bone loss around implants. After discussing a few things with colleagues who have taken numerous other courses, none had covered these topics so comprehensively. Dr. Park is a truly humble person who was kind enough to share all his cases, complications, difficulties encountered in those cases and how best to tackle each case. The small class size allowed for great interaction and ensured everyone stayed engaged throughout the session.

★★★★★

Dr. Nita K

The course is very informative and well organized. I am a general dentist and got an opportunity to brush up my basics, and also learn the topics like implant case treatment planning and the significance of soft and hard tissue management. I highly recommend this course to fellow dentists.

★★★★★

Dr. James L

Great course for anyone looking into implant dentistry.
Very informative theory component and variety of Hands-On. Experienced and engaging Speaker Dr Sam is excellent.

★★★★★

Dr. JY N

Sam is an approachable mentor that has a good depth of implant knowledge to learn from.
We covered so much in the time that we had and it was a course I'd recommend to any dentists.
