COURSE SUMMARY

Patients with untreated gingival recessions have a tendency to increase in the existing recession or development of a new recession. Gingival recessions result in unaesthetic appearance, hypersensitivity and increased risk of root caries.

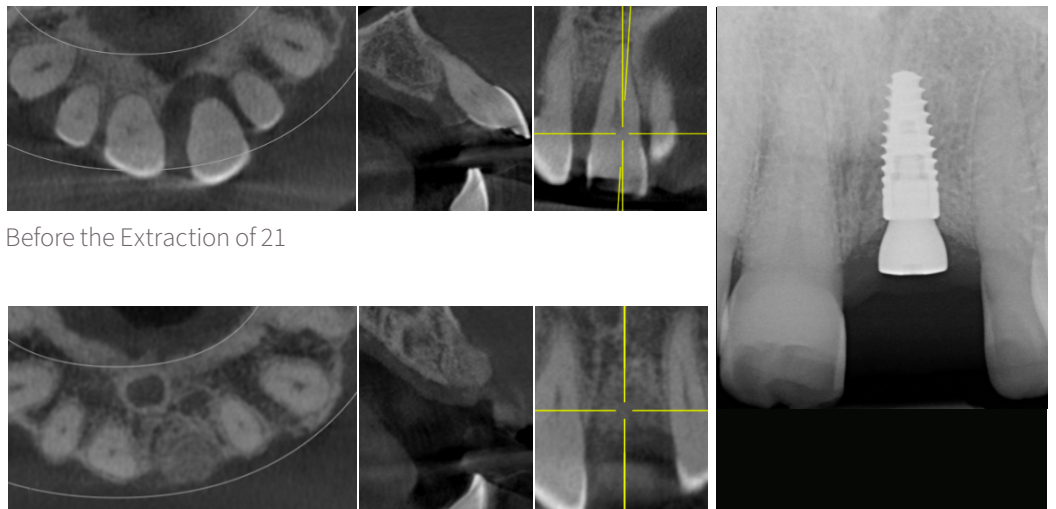

In the first half of this lecture, we will go through various surgical techniques that address gingival recession, soft tissue handling and connective tissue harvesting, suture techniques and healing management.

Schropp et al., 2003 reported that 50% of the ridge width is lost during the first 3 months after tooth extraction. In the second half of the lecture, we will touch on how to maintain a good soft tissue profile with socket preservation procedures that maintain both hard and soft tissue volume. Participants will learn how to prepare surgical sites for easy implant placements.

SURGICAL SITE PREPARATION PROCESS

Socket Preservation for Implant

Before the Extraction of 21

Socket Graft 21; 3 Months

Implant 21

COURSE CURRICULUM

09:00 - 10:15	1 Understanding Gingival Recession	12:45 - 13:45	3 Soft Tissue Management Part 1
	<ul style="list-style-type: none">• What is a gingival recession and what are the causes of gingival recession?• Classification of gingival recession• Management of gingival recession		<ul style="list-style-type: none">• Tunnel technique for root coverage• Free gingival graft procedure
10:15 - 10:30	Morning Tea	13:45 - 14:45	4 Hands-on
10:30 - 12:00	2 Suture Techniques	14:45 - 15:00	Afternoon Tea
	<ul style="list-style-type: none">• Successful root coverage procedures require good suture techniques• Practical hands-on various suture techniques	15:00 - 16:00	5 Soft Tissue Management Part 2
12:00 - 12:45	Lunch		<ul style="list-style-type: none">• Socket preservation
		16:00 - 17:00	6 Hands-on

COURSE DIRECTOR

Dr Rachel Lee

Periodontist

B OralH/GDipDent,
DClinDent (Perio)

Dr Rachel Lee is a registered specialist periodontist. She graduated from dental school with academic excellence awards. Her passion for periodontology led her to complete doctor of clinical dentistry in periodontology. She has been a clinical supervisor at Griffith University for several years. Her special interest in periodontal medicine led her to research on the association between inflammatory bowel disease and periodontitis. She published her research on journal of clinical medicine in 2023.

Dr Lee is committed to delivering high standard of care to her patients, offering a wide scope of practices including periodontal treatments, hard and soft tissue reconstruction, periodontal plastic surgery, sinus augmentation and implant surgery.
